

St. Bernadette's Olympic Kindergarten

You are invited to help your child win a Gold Medal learning experience in St. Bernadette's full day kindergarten program. Our program builds upon and further develops the skills learned in pre-school. Children use hands-on manipulatives to aid in the enhanced development of academic skills. Daily formal instruction will be presented in religion, reading, and math. Bi-weekly periods of art, social studies, science, health, phys ed, and computer are experienced by all students.

Vault into a fun-filled day of math where students attain an understanding of number sense, patterning, addition, subtraction, fractions, measurement, telling time, and problem solving skills.

Score big in the area of language arts! Your child will learn to recognize and properly form letters and numbers. Each child will have fun learning about the letter people and utilizing the learned skills to aid them in reading. What an exciting time! They will also learn comprehension and decoding skills. Your child will then learn to predict outcomes in stories, and many other reading skills. Writing skills will be initiated and further developed throughout the year. Each student visits the library on a weekly basis for story time and book check out.

The spiritual development of your child expands through various lessons, projects, prayer services, and participation in total school liturgies. Outreach projects to the community are ongoing throughout the year. Your child will be encouraged to respect themselves, others and their property.

Mrs. Dull and Mrs. Imro along with an aide will work to provide a positive experience that your child will love.

Come and give your child a bright future in Mrs. Dull's class.
